

**Information and Data Tables:**

The President's budget for 2010 totals \$3,846,600,000,000.00.

The financial cost of the Iraq War and the War in Afghanistan are not part of the defense budget; they are appropriations.

Along with this is a Debt. With projected receipts significantly less than projected outlays, the budget proposed by President Obama predicts a net deficit of approximately \$1.589 trillion, adding to a United States governmental debt bringing the total debt to about \$14.456 trillion.

## 15. United States Department of Education

ED was created in 1980 by combining offices from several federal agencies. ED's mission is to promote student achievement and preparation for global competitiveness by fostering educational excellence and ensuring equal access. ED's 4,200 employees and \$68.6 billion budget are dedicated to:

- Establishing policies on federal financial aid for education, and distributing as well as monitoring those funds.
- Collecting data on America's schools and disseminating research.
- Focusing national attention on key educational issues.
- Prohibiting discrimination and ensuring equal access to education.

\* There is a discrepancy in the President's Budget amount and the reported ED budget on the ED website. The President's Budget is \$41.4 Billion but ED reports a budget of \$68.6 Billion.

## 16. United States Department of Energy

The Department of Energy's overarching mission is to advance the national, economic, and energy security of the United States; to promote scientific and technological innovation in support of that mission; and to ensure the environmental cleanup of the national nuclear weapons complex. The Department's strategic goals to achieve the mission are designed to deliver results along five strategic themes:

- Energy Security: Promoting America's energy security through reliable, clean, and affordable energy
- Nuclear Security: Ensuring America's nuclear security
- Scientific Discovery and Innovation: Strengthening U.S. scientific discovery, economic competitiveness, and improving quality of life through innovations in science and technology
- Environmental Responsibility: Protecting the environment by providing a responsible resolution to the environmental legacy of nuclear weapons production
- Management Excellence: Enabling the mission through sound management
- Within these themes there are sixteen strategic goals which are designed to help DOE successfully achieve its mission and vision.

## 20. United States Department of the Interior

The Department of the Interior (DOI) is the nation's principal conservation agency. Our mission is to protect America's treasures for future generations, provide access to our nation's natural and cultural heritage, offer recreation opportunities, honor our trust responsibilities to American Indians and Alaska Natives and our responsibilities to island communities, conduct scientific research, provide wise stewardship of energy and mineral resources, foster sound use of land and water resources, and conserve and protect fish and wildlife. The work that we do affects the lives of millions of people; from the family taking a vacation in one of our national parks to the children studying in one of our Indian schools. Interior is a large, decentralized agency with over 67,000 employees and 280,000 volunteers located at approximately 2,400 operating locations across the United States, Puerto Rico, U.S. territories, and freely associated states. We discharge our responsibilities on a \$16.8 billion total annual budget. DOI raises more than \$18.2 billion in revenues collected from energy, mineral, grazing, timber, recreation, land sales, and other revenue producing activities.

\*There is a discrepancy in the President's budget of \$11.3 billion and the DOI websites budget report of \$16.8 billion.

### 32. National Science Foundation

The National Science Foundation (NSF) is an independent federal agency created by Congress in 1950 "to promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense..." With an annual budget of about \$6.06 billion, we are the funding source for approximately 20 percent of all federally supported basic research conducted by America's colleges and universities. In many fields such as mathematics, computer science and the social sciences, NSF is the major source of federal backing.

### 33. Small Business Administration

The U.S. Small Business Administration (SBA) was created in 1953 as an independent agency of the federal government to aid, counsel, assist and protect the interests of small business concerns, to preserve free competitive enterprise and to maintain and strengthen the overall economy of our nation. We recognize that small business is critical to our economic recovery and strength, to building America's future, and to helping the United States compete in today's global marketplace. Although SBA has grown and evolved in the years since it was established in 1953, the bottom line mission remains the same. The SBA helps Americans start, build and grow businesses. Through an extensive network of field offices and partnerships with public and private organizations, SBA delivers its services to people throughout the United States, Puerto Rico, the U. S. Virgin Islands and Guam.

### 36. National Infrastructure Bank

The creation of a National Infrastructure Reinvestment Bank was first proposed by Senator Christopher J. Dodd and Senator Chuck Hagel in 2007. Barack Obama backed this proposed legislation in February 2008. Obama suggested that the Bank would borrow US\$60 billion of federal funding to invest in infrastructure over 10 years, while leveraging "up to \$500 billion" of private investment. It would invest in high-speed trains to provide an alternative to air travel, energy efficiency and clean energy, among others. According to Obama, the Bank's "work will be determined by what will maximize our safety and security and ability to compete" and it would "create nearly two million new jobs", mainly in the construction industry.
